Model portfolios may be used to diversify premium among multiple accounts. An owner may reallocate funds in or out of a model portfolio at the end of each crediting term. Funds allocated to a model portfolio will automatically rebalance on each contract anniversary based on the initial allocation percentages established at issue. An owner may also elect to manually allocate premium to individual accounts currently offered. These allocations can be used in conjunction with model portfolios or without any allocation to a model portfolio. The sum of total allocations between model portfolios and individual accounts must equal 100%.

A 60-day rate lock shall begin on the date a Chartline application is signed by the policyholder(s) so long as the application is received in good order by Knighthead within 7 days of the application signed date.

If the contract is issued within the 60-day rate lock period, the contract will receive the greater of: (a) the crediting rate in effect on the date the application is signed, or (b) the crediting rate in effect as of the date all funds are received. If the contract is issued beyond the 60-day rate lock period, the contract will be issued with the then-current crediting rate. If the contract is funded from multiple sources, the contract will only be issued once all funds specified in the application are received and in good order.

Knighthead Life may impose a Withdrawal Charge and MVA against certain withdrawals from the contract value. Any Withdrawal Charges and MVA will be calculated in accordance with the Withdrawal Charge Schedule shown on the Contract Data Pages and the MVA formula detailed in the MVA Rider, respectively.

The Bailout Rate Waiver provides that 100% of the contract value may be withdrawn free of withdrawal charges and MVA. Eligibility requires a renewal rate to be set on any eligible strategy that is less than the applicable bailout rate.
